

THIS SHIT WORKS!

Works with any nutrient line

Use with any medium

Most robust beneficial bacteria on the market

INCREASES NUTRIENT UPTAKE

INCREASES YIELD UP TO 30%

INCREASES FLAVORS, OILS AND TERPENES

WHY THIS SHIT WORKS

- Over 4,000 species of microbes - more than any other beneficial bacteria on the market*
- Billions of microbes in every dose
- Beneficial Bacteria promotes nutrient mineralization and availability, and acts as a biocontrol agent to fight off plant pests, parasites, and diseases
- Turns any medium into a thriving and naturally occurring ecosystem
 - OMRI certified 100% organic
 - Crafted at our farm - not in a lab

AIN'T NO OTHER SHIT LIKE IT!

DOSING INSTRUCTIONS

SOIL / SOILLESS

- Seed Germination:** 1 mL of Fish Shit per gallon of water.
- Cloner:** 2 mL of Fish Shit per gallon of water.
- Root Dip:** 50 mL of Fish Shit per 50 mL of water. Can be added to reservoir for feed...no need to waste good Shit!!!!
- Transplant Aid:** 6 mL of Fish Shit Per gallon of water. Water at base of plant. Helps aid with effects of transplant shock.
- Vegetative Growth Phase:** Use 6 mL per gallon on the first feeding/watering. Use 3-6 mL of Fish Shit through all weeks of vegetative growth. Promotes vigorous and heavy growth.
- Bloom Growth Phase:** 3-6 mL of Fish Shit per gallon of water.
- Flush with Fish Shit:** Use 3-6 mL of Fish Shit while flushing your plants. Fish Shit helps break down salt and nutrient build up.

HYDROPONIC

- Seed Germination:** 1 mL of Fish Shit per gallon of water.
- Cloner:** 2 mL of Fish Shit per gallon of water.
- Root Dip:** 50 mL of Fish Shit per 50 mL of water. Can be added to reservoir for feed...no need to waste good Shit!!!!
- Transplant Aid:** 6 mL of Fish Shit Per gallon of water. Water at base of plant. Helps aid with effects of transplant shock.
- Vegetative Growth Phase:** Use Fish Shit at a dilution rate of 2-4 mL of per gallon of water. Use through all weeks of vegetative growth.
- Bloom Growth Phase:** Use Fish Shit at a dilution rate of 2-4 mL of per gallon of water. Use through all weeks of bloom.
- Flush with Fish Shit:** Use 3-6 mL of Fish Shit while flushing your plants. Fish Shit helps break down salt and nutrient build up.
